Discrete Mathematics
Volume 235, Numbers 1–3, 28 May 2001

Contents

Foreword

M. Fiedler, J. Kratochvíl and J. Nešetřil xvii

Contribution

B. Korte and J. Nešetřil
Vojtěch Jarník's work in combinatorial optimization 1

Algorithms and complexity

C. Àlvarez, J. Díaz and M. Serna
The hardness of intervalizing four colored caterpillars 19

L. Babel, T. Kloks, J. Kratochvíl, D. Kratsch, H. Müller and S. Olariu
Efficient algorithms for graphs with few P_4's 29

S. Bylka
Local improving algorithms for large cuts in graphs with maximum degree three 53

K. Cameron
Thomason's algorithm for finding a second hamiltonian circuit through a given edge in a cubic graph is exponential on Krawczyk's graphs 69

M. Caramia and P. Dell'Olmo
A lower bound on the chromatic number of Mycielski graphs 79

J. Fiala
Computational complexity of covering cyclic graphs 87

P. Hliněný
Contact graphs of line segments are NP-complete 95

F. Roussel and I. Rusu
An $O(n^2)$ algorithm to color Meyniel graphs 107

P. Wang, G.W. Dueck and S. MacMillan
Using simulated annealing to construct extremal graphs 125

A lower bound on the chromatic number of Mycielski graphs 79

J. Fiala
Computational complexity of covering cyclic graphs 87

P. Hliněný
Contact graphs of line segments are NP-complete 95

F. Roussel and I. Rusu
An $O(n^2)$ algorithm to color Meyniel graphs 107

P. Wang, G.W. Dueck and S. MacMillan
Using simulated annealing to construct extremal graphs 125

Extremal combinatorics and Ramsey theory

R. Babilon
3-colourability of Penrose kite-and-dart tilings 137

C. Bey
An intersection theorem for weighted sets 145

S. Gravier, M. Mollard and C. Payan
On the nonexistence of three-dimensional tiling in the Lee metric II 151

I. Gorgol
A note on a triangle-free — complete graph induced Ramsey number 159

C.F. Laywine
A derivation of an affine plane of order 4 from a triangle-free 3-colored K_{16} 165

U. Leck
Optimal shadows and ideals in submatrix orders 173

Algebra and number theory

A. Drápal
Hamming distances of groups and quasi-groups 189

S. Eliahou and M. Kervaire
Restricted sums of sets of cardinality $1+p$ in a vector space over F_p 199

H. Era, K. Ogawa and M. Tsuchiya
On transformations of posets which have the same bound graph 215

S. Evdokimov and I. Ponomarenko
Two-closure of odd permutation group in polynomial time 221

M. Fiedler
A numerical approach to long cycles in graphs and digraphs 233

D. Stevanović
Hosoya polynomial of composite graphs 237

Random graphs and methods

J. Díaz, J. Petit, M. Serna and L. Trevisan
Approximating layout problems on random graphs 245

J. Komlós, G. Sárközy and E. Szemerédi
Proof of the Alon–Yuster conjecture 255

B. Nagle and V. Rödl
The asymptotic number of triple systems not containing a fixed one 271

I. Tomescu
On the number of graphs and h-hypergraphs with bounded diameter 291

Structural combinatorics and graph theory

A. Idzik and Z. Tuza
Heredity properties of connectedness in edge-coloured complete graphs 301

J. Körner and K. Marton
Relative capacity and dimension of graphs 307

F. Matúš
Excluded minors for Boolean polymatroids 317

L. Nebeský
The set of geodesics in a graph 323

J. Nešetřil and A. Pultr
A note on homomorphism-independent families 327

V. Nýdl
Graph reconstruction from subgraphs 335

R. Šámal and J. Vondrák
The limit checker number of a graph 343

B. Zelinka
Periodicity of graph operators 349

Applications

D. Amar, A. Raspaud and O. Togni
All-to-all wavelength-routing in all-optical compound networks 353

E.V. Konstantinova and V.A. Skorobogatov
Application of hypergraph theory in chemistry 365

T. Nakamigawa
Nakade — a graph theoretic concept in Go 385

P. Pančoška, V. Janota and J. Nešetřil
Novel matrix descriptor for determination of the connectivity of secondary structure segments in proteins. Analysis of general properties using graph theory 399
